### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Santucci on 1/23/04. In order to provide a clear distinction between the preamble of the claim and its body, it was agreed upon to amend claims 1-6 and 8, back to its previous Jepson format.

The application has been amended as follows:

In claim 1, after "the Yankee cylinder, the", - - improvement comprising an essentially impermeable- - was inserted.

In claim 2, "A belt" was deleted and - - An improvement- - was inserted.

In claim 3, "A belt" was deleted and - - An improvement- - was inserted.

In claim 4, "A belt" was deleted and - - An improvement- - was inserted.

In claim 5, "A belt" was deleted and - - An improvement- - was inserted.

In claim 6, "A belt" was deleted and - - An improvement- - was inserted.

In claim 8, "A belt" was deleted and - - An improvement- - was inserted.

The following is an examiner's statement of reasons for allowance: The cited prior art fails to disclose the claimed tissue paper machine in combination with a transfer belt having the properties recited in claim 1. The closest prior art (US (US 5298124) discloses a transfer belt having the claimed properties for transferring a web to another

Art Unit: 1731

fabric or belt, but is silent disclosing or reasonably suggesting transferring the web onto a yankee cylinder via a transfer nip. While the US 5298124 provides for a transfer belt having an enhanced adhesion of the web to the transfer belt while the belt passes through a press nip, the US 5298124 does not disclose that said enhanced adhesion will be sufficiently small to allow for the web to be transferred to a yankee cylinder via a transfer nip. Thus it is concluded that US 5298124 does not reasonably suggest transferring a web onto a yankee cylinder via a nip wherein the transfer belt is specifically designed to have an enhanced adhesion to the web when inside a nip.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
